ACOUSTIC

The future of modular flooring

The future of modular flooring
 SmartDrop Acoustic is the result of the newest development in luxury vinyl flooring – modular plank technology.

It is the innovative composition of SmartDrop Acoustic that makes this product unique...

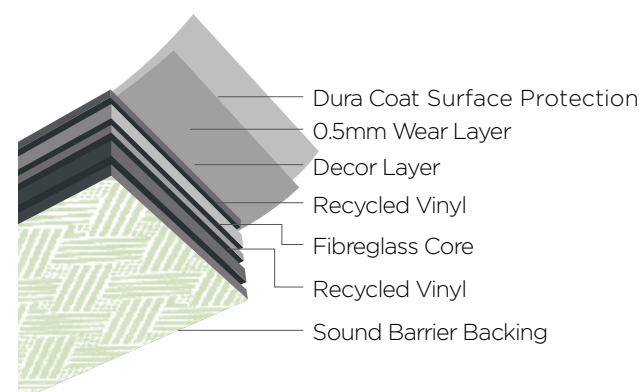

- It simply 'drops' into place, requiring minimal pressure sensitive adhesive, making it the quickest and easiest to install flooring of its kind.
- SmartDrop Acoustic contains a fibreglass reinforcement layer throughout the plank for superior stability.
- The 5.0mm thick plank provides superior and supportive underfoot comfort and excellent acoustic properties.
- The 0.5mm PU wear layer combined with the DuraCoat surface protection create a product that will look good for longer. It is backed up by a 20 year residential and 7 year commercial manufacturer's warranty.
- Contains Nano-Silver anti-bacterial and anti-fungal technology.
- SmartDrop Acoustic contains quality recycled material and is a 100% recyclable product.
- Can be installed directly onto or over most existing hard floors provided they are prepared in accordance with Australian Standard AS1884:2012.
- SmartDrop Acoustic is suitable for most domestic and commercial applications. It complies with the BCA impact sound insulation requirement for 200mm slabs as found in new construction multi storey apartments and buildings.
- SmartDrop Acoustic **Plus** is available via special order, where sound absorption is acutely critical. It features the same colour range with an enhanced sound barrier backing that enables the product to pass the 150mm slab test.

More than just smart technology

The Kenbrock design team have researched the timber colours, patterns and grains that Australians love to see in their homes and especially on their floors.

SmartDrop Acoustic features an 11 colour palette faithfully reproduced from the finest of local and international timbers. Sassafrass from Tasmania, Hickory from Colorado, the tones of Oaks once found only in chateaux and castles.
