DESIGN FLOORING

The District Collection

The District Collection is a contemporary range of flooring inspired by Europe and Australia's most fashionable colours. Featuring six oaks in grey and natural tones, the collection is completed with the inclusion of Australia's most popular timber species, Blackbutt and Spotted Gum. Utilising the most realistic timber designs, and highest quality materials, the District Collection offers a product that is suitable for use throughout your entire home, including wet areas.

Created with the most realistic timber emboss and coated in a low gloss urethane lacquer, these products have been designed to offer low maintenance comfort whilst adding a luxurious and contemporary feel to your home. Finished with a distinctive bevelled edge, the planks are easy to clean and will look stunning for many years to come.

The District Collection is available in both Vinyl Plank and Hybrid, allowing you the ease and versatility of a floating or glue-down installation.
